A. The purpose of these guidelines is to help provide a uniform system for political subdivisions in southern Navajo County to determine what fire restrictions are needed and when they are to be put into place during emergency fire conditions. In addition, one goal of these guidelines is to have neighboring jurisdictions work together to try to establish a uniform date for implementation of fire restrictions.

B. It shall be the duty of the Town's Emergency Management Director after consultation, if necessary, with the U.S. Forest Service, local fire districts, other emergency management directors in the region, etc., to initiate fire restrictions within the Town during emergency fire conditions.

C. The Town's Emergency Management Director will utilize the U.S. Forest Service ("U.S.F.S.") Apache-Sitgreaves Energy Release Components ("ERC") Monitoring System to help determine when fire restrictions may be necessary. As a general guideline, when the ERC reading reaches 90% for at least 5 consecutive days ~~eighty (80)~~, fire restrictions should be considered.

D. The Emergency Management Director for Navajo County will work with the Town's Emergency Management Director to attempt to initiate and coordinate a uniform date for implementing fire restrictions.

E. When the Town's Emergency Management Director, after consultation with the Town Manager, determines that fire restrictions are necessary and the date of initiation has been determined, the Town's Emergency Management Director will direct that appropriate fire restrictions be ordered, and will notify the public of the nature and extent of the fire restrictions and the effective date. Fire restriction information needs to be disseminated not only to local residents, but to visitors and tourists as well. (Ord. 12-362; Ord. 05-249 § 2 (part))
